

National Organic Program

Post Test –May 2015

Please keep this test and certificate in your files for Licensing.
You do not need to send it in to our office or the State.

Learning Objective: After reading the newsletter, the provider understands the definition of organic foods and some of the other labeling according to the USDA.

1. Organic methods integrate cultural, biological, and mechanical practices that foster cycling of resources, promote ecological balance, and conserve biodiversity.
True or False
2. Synthetic fertilizers, sewage sludge, _____, and genetic engineering may not be used in products labeled organic.
3. The National Organic Program regulates all organic crops, livestock, and agricultural products certified to the United States Department of Agriculture (USDA) organic standards. USDA conducts investigations and conducts enforcement activities to ensure all products labeled as organic meet the USDA organic regulations.
True or False
4. In order to sell, label, or represent their products as organic, operations must follow all of the specifications set out by the _____ organic regulations.
5. If you see the USDA organic seal, the product is certified organic and has _____ percent or more organic content.
6. There are other voluntary labels for livestock products, such as meat and eggs. Animal raising claims must be truthful and not misleading. USDA's Food Safety Inspection Service does not verify the truthfulness of these claims.
True or False
7. The _____ range label indicates that the flock was provided shelter in a building, room, or area with unlimited access to food, fresh water, and continuous access to the outdoors during their production cycle. The outdoor area may or may not be fenced and/or covered with netting-like material.
8. As required by USDA, meat, poultry, and egg products labeled as "natural" must be minimally processed and contain no artificial ingredients. However, the natural label does not include any standards regarding farm practices and only applies to processing of meat and egg products. There are no standards or regulations for the labeling of natural food products if they do not contain meat or eggs.
True or False
9. Due to the number of variables involved in pasture-raised agricultural systems, the USDA has not developed a federal definition for _____ products.
10. Federal regulations have never permitted _____ or steroids in poultry, pork, or goat.
